m-series

... for maximum modularity
Our Modular Frame System is being used throughout the U.S. in major retail stores because it’s easy to install, looks stunning, and has the flexibility to change to suit the demands of today’s retail environments.

The unique Modular Frame System will future proof your store by allowing you to easily re-configure the shape of your store and add or delete wall footage as needed.

Our Modular Frame System saves time and money through its stunning simplicity.

We have used this simple and effective system to build the store our customers need.

About Walls+Forms, Inc.

Walls+Forms has been an innovator in merchandising solutions for over 20 years. From the beginning we have been known for our creative, value laden engineering. We started out as a patented component part supplier to store fixture manufacturers. Today we have a 200,000 square foot plant in the Dallas, Texas area. We offer a diverse line of products and services which include display systems of many types. These include counters, wall systems, desks, cabinets, fitting rooms, lighted and unlighted sign frames, and so on. We have consistently enjoyed an excellent reputation for high quality, great service and overall value. In addition to Wireless Stores, we serve a wide array of markets, including Electronics, Retail and Technical Merchandising. Our clientele list includes some of the largest names in the related industries.

We are grateful for this opportunity to serve MetroPCS. Based on our insights from the retail market, we believe the modularity of the frame system will benefit MetroPCS for years to come. This will help you to continue to provide your customers with the most current wireless products on the market. We are excited to be a part of this process.

The Modular Frame System

Introducing the “M-Series Display Solutions” for MetroPCS.

*Invite your customers to Connect, Discover & Experience this fresh new look!*

**SIMPLICITY:** There are no complicated parts to worry about. Our system eliminates assembly errors, mis-ordering and high inventory costs. Each display consists of minimal components. Panels, panel fastening trims and accessory options come completely from one source, Walls+Forms. Panels snap together in minutes and full merchandising can be accomplished in a few hours.

**AFFORDABILITY:** Part standardization permits low prices with low minimum quantity. High construction costs, mess and lengthy time delays are eliminated.

**EASE OF ASSEMBLY:** Each display format has been designed for ease of assembly by non-construction personnel. Either you, store personnel or a contractor can assemble each system with ease! To reduce assembly time, detailed assembly instructions are included with your display.
Large Store Layout / 1000’ sq. ft.

01. TRANSACTION COUNTER

Notes:

INTRODUCTION:

This guide was created to help you, the retailer, in designing a store that works for you! Walls+Forms, Inc. has provided retailers professional design and space planning services for years but now you can help!

HOW IT WORKS:

Each item in our Basic Store Fixturing Package is represented with an illustration, dimensioned plan view and approximate square footage block diagram. Each square or block represents a 12” area. These items appear on multiple pages that you can use to reference the 4 major areas when laying out your store. The last page of this kit is the grid you will use to create your sketch. We recommend using pencil or running multiple copies of this page, so you can make changes if necessary.

Important Note:

Always round your numbers down when taking measurements for interior walls in the layout. Rounding down on interior walls makes sure that your fixtures will always fit in the constraints of the building. A few inches in the wrong direction can quickly stack up into several feet!

Follow this rule on your layout but make sure to let us know the actual dimension.

This Design is the property of Walls+Forms, Inc. and may not be reproduced or copied without prior written consent.
Remember to measure and draw in your perimeter walls and doorways first, before you begin your design.
